

Gentlemen,

The advent of XM radio has filled a void that is desperately needed especially to the traveling public. I now have at the touch of a button the up to date weather and traffic for selected cities in an instant. I am a commercial driver and spend approximately 300 days a year on the road. I no longer have to scroll thru numerous stations trying to find traffic and weather or wait for the traffic on the hour. This allows me to keep my attention focused on the job of piloting my semi through traffic not looking for a radio station. Please leave XM to fill this void as it has for the last 3 years.

Thank-you
